

MBA Summer Associate

Position Summary

Mirae is a global asset manager with \$650B of AUM across a wide span of strategies. Originally founded in Korea in the 1990s, the group has quickly grown its asset base and footprint across the globe. Within venture, they have deployed over \$6B in leading high growth companies across sectors including among others:

- AI: Cohere, Weka, Foundry, Foundry, Rebellion, d-Matrix, Valo Health, Insilico Medicine, XtalPi
- Climate: Impossible Foods, Ascend Elements, Element Energy, Apeel Sciences
- Gaming: Immutable X, Animoca Brands
- Other category defining businesses: Space X, DiDi, Coupang, Grab

The VC team is looking for an MBA Summer Associate to join the team for the summer in their US HQ in New York, with potential for conversion to a full-time position following a successful summer, to complement its teams in Seoul, Los Angeles, India, Australia.

Primary Responsibilities

- Collaborate with VC team in each stage of the investment process
- Research sector themes and identify companies for potential investment
- Evaluate companies through industry research, market sizing, competitive benchmarking, customer and management references, and financial analysis, as well as drive due diligence
- Provide support to portfolio companies in various areas including, commercial introductions, M&A opportunities and through personal network
- Build relationships across global VC ecosystem

Qualifications

The ideal candidate has:

- 2-4 years of experience split between finance (investment banking, strategy consulting, private equity or a similar field) and technology (finance, operations, or product management at a software company).
- Prior VC/PE investing experience not required, but a plus.
- 1st or final year of leading MBA program
- Intellectual curiosity - You are both naturally inquisitive and humble; you strive to be intellectually honest
- Is a self-starter – We are a small group and you will be expected to drive many parts of the process and will often operate independently; but you are also collaborative and can enjoy being part of a team.
- Analytical and communication skills - You enjoy discussing a claim rationally, and supporting arguments with data (quantitative and qualitative); you can conduct financial modeling, market sizing, evaluation competitive tensions and strategy; you can communicate the outcome of your findings clearly both verbally and in writing.
- Burgeoning industry knowledge - You have an appetite to build understanding of major technology trends and business models and the emerging companies at the forefront of those trends.
- Developing Emotional Quotient (“EQ”) –You are empathetic to the risks and struggles that founders undertake building their companies. You are keen to learn how to assess founders and how to incorporate those judgements into an investment view. People who have met you generally walk away with a lasting and positive impression of you.
